

Project C

2003 – 2050

bazaarmodel.net

Phase II 2022 – 2032

Eye opener

To Heal in The Electric Universe

To Heal..

Our manic depressive economy

- Global financial reform

Our organizations

- Which are still feudal

Our learning environments

- A holistic approach, Educating for Wisdom & Compassion:
Creating Conditions for Timeless and Embodied Learning (inner well-being)

Mind, body and soul (consciousness)

- Curing cancer, age reversal, body regeneration (organs, limbs etc.)

Our manic depressive economy

'The "Manic-Depressive" Economy .. [is] of high human and personal cost..'

– Jesús Huerta de Soto, [Money, Bank Credit, and Economic Cycles](#), p. 457

'Until specialists and society in general fully grasp the essential theoretical and legal principles associated with money, bank credit, and economic cycles, we may realistically expect further suffering in the world due to damaging economic recessions..'

– Jesús Huerta de Soto, [Money, Bank Credit, and Economic Cycles](#), pp. 811-2

We need financial reform to heal our economy and end '..the current "financial slavery" that grips the world..'

– Jesús Huerta de Soto, [Economic Recessions, Banking Reform, and .. Capitalism](#)

Our organizations

'Most organizations are still feudal at their core..'

– Gary Hamel (<https://bazaarmodel.net/phorum/read.php?3,10532>)

True autonomous freedom means ownership of tasks in a role and ownership of one or more roles. To take responsibilities instead of taking orders. Feeding intuition with facts, to be an affective sensor:

'There is a word that often comes up with Teal pioneers: *sensing*.'

– Frederic Laloux (<https://bazaarmodel.net/phorum/read.php?3,9908>)

'..to fully harness the power of every human sensor.' – Holacracy, Sociocracy. (<https://bazaarmodel.net/thoughts/?p=885>)

Our learning environment

To Heal: Holistic learning - 'One of the most important goals is the development of wisdom.'

– John P. Miller (<https://bazaarmodel.net/phorum/read.php?3,10424>)

Educating for Wisdom and Compassion (Empathy)

'Holistic/Integrative timeless learning is not limited to the intellect; it also is connected to the emotions, the body, and soul/spirit. *Soul/spirit* is defined here as a vital, mysterious energy that can give meaning and purpose to our lives..'

– John P. Miller (<https://bazaarmodel.net/phorum/read.php?3,11157>)

'..The modern world calls for people who are flexible, creative, inventive, people who can make choices themselves, people with a high degree of adaptability. We strive to help children embrace the uncertain future of tomorrow.'

– Holistic Education for the Future (<https://bazaarmodel.net/phorum/read.php?3,10822>)

To heal mind, body and soul

'We have projects in development, regeneration, and cancer, as well as in the plasticity of the brain and its connection to somatic tissues. These fields are treated as distinct by most labs, funding bodies, and educational programs, but we span them because we are seeking the most fundamental aspects of biological regulation, and we hypothesize that common rules of information processing might be discovered throughout these aspects of biology.'

– The Levin Lab, drmichaellevin.org (bioelectricity)

Curing with bioelectricity

- Curing cancer, infections etc.
- Regenerating our body (limbs, eyes, brain etc.) and age reversal

Consciousness; spiritual, bodily, organical, cellular and elemental particles

Training for Peace

'All scientific knowledge (type B) rests on a foundation of tacit knowledge that cannot be expressed in words (type A). The relationship between the two sorts of knowledge is complex and has been little studied.'

– Jesús Huerta de Soto, *Socialism, Economic Calculation and Entrepreneurship*, p. 28 <https://www.jesushuertadesoto.com/books/books-in-english/socialism-economic-calculation-and-entrepreneurship/>

- Learn the haptonomical grammar and language (ethical affective development)
- Scholastic logic reasoning grounded in an affective (embodied) sensing experience; holistically developing one's intuition, 'knowledge not parceled and segmented..' (<https://bazaarmodel.net/thoughts/?p=199>)
- Math must be rooted in a healthy affective embodied holistic learning style

'..intellect should go hand in hand with the emotions and intuitions..' – Seth, *The Eternal Validity of the Soul*

Making Contact via Action

'We have to learn again that science without contact with experiments is an enterprise which is likely to go completely astray into imaginary conjecture.'

– Hannes Alfvén *

'For it is through actions that the mind and reality make contact.'

– Hans-Herman Hoppe *

'..tactile contact in order to heal, to make whole, to confirm the others existence.'

– Frans Veldman *

'The distinctive and crucial feature in the study of man is the concept of action. Human action is defined simply as purposeful behavior..'

– Murray N. Rothbard (<https://bazaarmodel.net/phorum/read.php?3,8327>)

Affective-mental Contact via Action in the Electric Universe

* Contact: <https://bazaarmodel.net/thoughts/?p=196>

Status update Phase I

Energy: Safire net energy breakthrough was in 2019 (aureon.ca)

Safire clean plasma reactors will be commercially available in 2025, fusion in 2028 (lppfusion.com), ending global energy poverty in 2045

Energy abundance is a safety net to reform* the planet towards an humane environment within an ethical affective ambiance

Data: Intelligent interactive affective teal learning environments & organizations are on the rise, like equinoxschool.ca, verenigingagoraonderwijs.nl (dutch) and buurtzorg.com

More teal news: enliveningedge.org, reinventingorganizations.com, corporate-rebels.com

Matter: Safire is also the start of clean materials production, like rare earth elements: <https://vimeo.com/453152469> at 6:53

* Like financial and tax reform: 'All personal allowances are removed. Instead everyone receives universal basic income, which is taxed as part of the single income tax. This will also thus bring simplification to both welfare and taxation.' - Dominic Frisby, *Daylight Robbery* (2020), p. 219

Project C – 2003 - 2050

Summary – Affective Human Action* & Healing in the Electric Universe

- **Overview:** <https://bazaarmodel.net/Project-C/Overview-Project-C.pdf>
- **Introspection:** <https://bazaarmodel.net/thoughts/?p=231>
- **Holacracy:** <https://bazaarmodel.net/thoughts/?p=885>
- **Phase II:** <https://bazaarmodel.net/phorum/read.php?3,11606>

'Current education is actually a form of child abuse.'

– Sjef Drummen, *Catharsia* (2019), p. 13 (<https://www.onderwijskunstenaar.nl>)

'I believe that the current doomed education system should be completely replaced by an ethically sound model.'

– Sjef Drummen, *Catharsia* (2019), p. 19 (<https://bazaarmodel.net/phorum/read.php?3,10822>)

* <https://bazaarmodel.net/phorum/read.php?3,9225>

Sneak peak on Phase III

'So far, atom lasers have been created by extracting a beam of atoms from a so-called Bose-Einstein condensate..'

– Toward a continuous atom laser, <https://bazaarmodel.net/phorum/read.php?3,10443>

'..in fact extremely simple underlying rules - that might for example potentially be implemented directly at the level of atoms - are often all that is needed.'

'And indeed one of the things that emerges from this book is that traditional engineering has actually considered only a tiny and quite unrepresentative fraction of all the kinds of systems and processes that are in principle possible.'

'..it seems likely that a system could be set up in which just one or a few atoms would correspond to a cell in a system like a cellular automaton. And one thing this would mean is that doing computations would then translate almost directly into building actual physical structures out of atoms.'

– Stephen Wolfram, [A New Kind of Science](#), pages 11, 840 and 841

Kristian Birkeland's intuition

'..the huge electrical importance of the universe.'

'...with his extraordinary intuition he had a feeling for the huge electrical importance of the universe. Future research may show that such messages from the sun are equally important to us as Galileo's understanding of messages from the stars when he took his telescope and studied space for the first time.'

– Sem Sæland, memorial address to Birkeland, September 22, 1919

(<https://bazaarmodel.net/phorum/read.php?3,8348>)
